

Map of the Dongling River Wetland in Tongjiang City, Heilongjiang Province, China. The map shows the wetland's location relative to the city and surrounding areas. The wetland is divided into three zones: the Core Zone (red), the Buffer Zone (yellow), and the Experimental Zone (green). The map includes a scale bar (1:250,000), a north arrow, and a coordinate grid. The legend identifies symbols for administrative centers, forest locations, farm locations, other settlements, county boundaries, county-level boundaries, protection zone boundaries, core zones, buffer zones, experimental zones, roads, and rivers.
